

# Sign up for Wongan Hills Feral Animal Workshop

**Join Wheatbelt NRM for an informative workshop on feral animal management.**

You will walk away from the event with your certificate of completion in Landholder training: safe use and management of 1080 and a more thorough understanding of feral animal management on your property.

1080 baiting is a useful tool in the feral animal management toolbox which can be used to reduce vermin numbers over time on your property. When used within the guidelines 1080 baiting can be a very effective way to assist in the management of vertebrate pests.

**Wednesday 20<sup>th</sup> March 2024**

**9.30am for a 10am start**

Workshop will be held at the Wongan Hills  
CRC Function Room

Morning tea and lunch will be provided

To book please email Aimee Ray
